Zip HydroTap G5 · Boiling & Chilled Drinking Water Tap

FILTERED · BOILING · CHILLED

Boiling. Chilled. One tap.

Instant filtered boiling and chilled water from a single tap, with the command centre tucked away under the counter.

ONE
Tap
DOES IT ALL

- 0.2 micron filtration
- Boiling & chilled
- Safety lock
- Auto-diagnostics
- 3 finishes

240
Boiling cups an hour, up to

175
Chilled glasses an hour, up to

0.2
Micron filtration

HOW IT WORKS

Everything from one tap.

The HydroTap command centre sits under the counter and connects to your water supply. It filters, boils and chills, ready for the next cup or glass.

1

Choose

Pick boiling or chilled from the tap. Boiling water needs the safety lock released first.

2

Pour

Water flows smoothly with minimal splashing, filtered to 0.2 micron.

3

Ready again

PowerPulse technology keeps stored boiling water close to your set temperature, so there is no waiting.

INSIDE THE COMMAND CENTRE

What it's doing for every glass

MicroPurity™ filtration. A built-in 0.2 micron filter for pure-tasting water.

Air-cooled chilling. An air-cooled refrigeration system that wastes no water.

Safety first. Boiling water safety lock, with smooth dispensing to minimise splashing.

PowerPulse technology. Maintains stored boiling water near your set temperature, with no energy wasted reboiling.

Auto-diagnostics. Continuously monitors the HydroTap's performance.

Smart settings. Choose energy modes and usage settings from the G5 menu.

Why it beats a kettle and a water cooler

	HYDROTAP G5	KETTLE + COOLER
Appliances	**One tap does boiling and chilled**	Two appliances to buy and run
Worktop	**Just the tap. The unit sits under the counter**	Kettle and cooler both take space
Waiting	**Instant boiling and chilled water**	Wait for the kettle to boil
Water quality	**Filtered to 0.2 micron**	Depends on the appliance
Capacity	**Suitable for up to 60 users**	Kettle-fulls one at a time

DESIGNED FOR THE WORKPLACE

A cleaner, safer kitchen.

The HydroTap replaces the kettle and the water cooler with one elegant tap. Install it over the sink as a second tap, or away from the sink on an optional drain font.

Tea | Coffee | Chilled water | Bottles

WHERE IT WORKS BEST

Offices
Boiling and chilled water for the whole team.

Staff kitchens
Frees the worktop of kettles and coolers.

Meeting rooms
Hot and cold drinks on hand.

Receptions
A premium look for visitors.

ADD-ONS

Make it fit your space

Drain font
Install the tap away from the sink on an optional font with drip tray.

Replacement filters
Keep MicroPurity™ filtration working at its best with scheduled filter changes.

Finishes
Bright chrome, brushed chrome or matt black.

Professional installation
Our team plumbs in the command centre and tap for you.

The command centre is air cooled, so it needs ventilation: at least 50 mm clearance each side and 200 mm above.
