AA First ArcticChill 108 · Mains-Fed Water Cooler

NO **Bottles** NEEDED

CHILLED WATER, STRAIGHT FROM THE MAINS

Press. Fill. Refresh.

Cold, filtered drinking water on tap. No bottles to order, store or lift, and a tall dispense area that takes sports bottles with ease.

Chilled water · Mains fed · Bottle friendly · Filtered · Built to last

35L
Chilled water per hour

29cm
Dispense height for tall bottles

0
Bottles to order or lift

HOW IT WORKS

As easy as turning on a tap.

The cooler connects to your water supply, so there's nothing to swap, store or run out of. Anyone can use it in three steps.

1

Press

One large push button starts the flow. No levers, no taps to leave running.

2

Fill

A 29 cm dispense height takes sports bottles, jugs and glasses without tilting.

3

Refresh

With 35 litres of chilled water an hour, it's cold and ready for the next person.

INSIDE THE COOLER

What it's doing for every glass

Direct chill. A high-capacity chiller cools water as it's needed, so it stays fresh.

Pressure control. A reducing valve and non-return valve protect the cooler and your pipes.

UV-C option. Klaran UV-C LED protects the dispense point from bacteria and viruses.

1-micron filter. Fitted on the supply line to give clean, great-tasting water.

Flood Guard included. The water inlet only opens while you're dispensing.

Built to last. The classic AA design is simple to maintain and made for daily use.

Why it beats a bottled water cooler

	ARCTICCHILL 108	BOTTLED COOLER
Supply	**Straight from the mains, so it never runs out**	Runs dry until the next delivery
Storage	**Nothing to store**	Stacks of full and empty bottles
Lifting	**None at all**	Heavy bottles to lift and swap
Running cost	**No charge per bottle**	Pay for every bottle delivered
Environment	**No plastic bottles or delivery vans**	Ongoing plastic and deliveries

BOTTLE FRIENDLY

Made for the bottles people actually carry.

With 29 cm of space under the outlet, staff can fill a tall sports bottle or a jug for the meeting room without tipping it under the tap.

Sports bottles | Reusable flasks | Jugs | Glasses | Cups

WHERE IT WORKS BEST

Offices
Fresh water for staff and visitors, all day.

Workshops
Keeps hard-working teams hydrated on every shift.

Gyms
Quick bottle refills between sessions.

Schools
Cold drinking water in corridors and halls.

ADD-ONS

Keep it safe, clean and dry

Installation rail and filter
1-micron filter, pressure reducing valve and non-return valve in one kit.

Klaran UV-C LED
Protects the dispense point from bacteria and viruses. Factory fitted or added later.

Flood Guard
Included as standard. The inlet only opens while water is dispensing.

Mains drainage
Connects the drip tray to a drain, or a pumped waste where there isn't one.

Overflow kits, a cowling and wall brackets are also available.
