J Class IN

Cosmetal Undersink Chiller

Impressive undersink chiller built by Cosmetal. Dispenses 45ltr/h of chilled and sparkling water, with a 9ltr continuous flow rate. There are 2 different J CLASS IN models, one produces ambient and chilled water (CEJIN45), and the other produces ambient, chilled and sparkling water (CEJIN45WG). The sparkling model requires CO2 gas cylinders and a regulator. For undersink chillers it is also important to allow space for ventilation around each unit. Poor ventilation will affect the chilling performance and could result in premature failure. This undersink unit is compatible with the following products: Drink Tower, G400, Cobra 2 and G72.

Accessories & More

Installation Rail & Filter

Includes compression fitting, 1-micron green filter, water block, copper pressure reducing valve & non-return valve. Multiple filter options available including Brita C150 scale filters.

Drink Tower

Electronic tap dispensing ambient, chilled & sparkling water. Compatible with the J Class IN WG undersink chiller.

G400

Electronic tap dispensing ambient, chilled & sparkling water. Compatible with the J Class IN WG undersink chiller.

Cobra 2

2-Way manual tap, dispensing ambient & chilled, or chilled & sparkling water. Compatible with both J Class IN models.

G72

Manual lever tap, dispensing ambient & chilled, or chilled & sparkling water. Compatible with both J Class IN models.
